

HireORJam

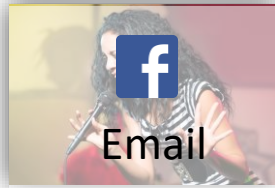

Hire Artists or Jam with them, globally!

Functionalities

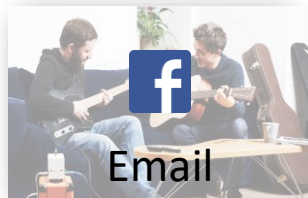

1. Social links: webapp, artist profiles to be shareable on Instagram, Facebook, Whatsapp
2. Sign up: 2 roles, users can identify as 'clients' interested in Hiring artists or, as artists looking to Jam/connect with other artists; simple facebook sign up/login for Hiring but a prompt to fill additional details (upload 1-2 vidoes, pictures, connect youtube, category selection, best suited for 'event', price per performance/duration, etc.) for artists
3. Profile: please see above; additonally the UI has to be simple with banner profiles showing the names, category, price, ratings & call-to-action for Booking/chatting; customer profiles will be super simple as they are not the main focus
4. Refer a friend (\$25 off during checkout): auto-generated links if some referred user signs up successfully & make a transaction
5. Search/filter: results/artist profiles to be filtered based on price, category, best suited for 'event', calendar availability (date range). Search could be on the same parameters
6. Chat: chat functionality b/w customers and artists; artists to artists; new/unread chats to be shown in message box with a clear sign
7. Location: auto-detected, GPS location (google maps) with an option to enter additonal fields
8. Virtual & in-person list: toggles on the top right to see artists who are available for virtual performance through Skype, Zoom, etc. OR/& for in-person performance at a physical location
9. Calendar: self-explanatory, to mark availability of artists, to be displayed in 10 mins slots for every available hour
10. Settings (bookings, payments, privacy, T&Cs): standard, self explanatory
11. Payment integration: paypal with 4-5 other supported integrations (direct transfer, credit card, IDEAL in Netherlands, etc.); has to be escrow based (similar to freelancer.com)
